

CashComplete® POS

– for a closed and secure retail cash loop

 **SCAN COIN**

www.scancoin.com

CashComplete® POS*, the point of sale system for the checkout, is a compact closed system allowing customers to pay easily and quickly using notes and coins, and receive their correct change.

CashComplete® POS consists of a Coin unit, a Note unit and a PC/Power unit.

Accurate counting providing customer confidence

World-leading sensor technology counts the coins and notes into the system, minimising the risk for counting errors and shrinkage. Recognising and rejecting counterfeit coins and notes is a vital function in a system that automatically recycles cash from one customer to the next. A store that accepts and passes on counterfeit cash, no matter how unwittingly, faces not only economic loss but also, and perhaps more damagingly, a sharp decline in customer confidence.

The Note unit can be installed to be used either by the cashier or the customer. Either way, it will never disturb client-cashier interaction.

SCAN COIN's patented coin sensors guarantee accurate counting and sorting.

With its fine balance between capacity and size, CashComplete® POS is designed to fit existing counters, but has been sensitively designed for both current and future checkout styles. Every note and coin can be recycled and cashback becomes an option. CashComplete® POS allows smooth integration with existing EPOS applications.

Paying with coins

Coins can be paid a handful at a time, which speeds up the transaction. It also encourages consumers to pay with coins, helping retailers to avoid change shortfalls. Typically, the recommendation is to face the coin unit towards the consumer and coins can be inserted while the goods are being scanned.

Paying with notes

Notes are inserted in a single slot, leading to a compact unit for easy integration in the checkout furniture. It also means that the notes do not have to be sorted manually. Many retailers choose to let the cashier accept and pay the notes into the system. However, with the high level of counterfeit detection, it is possible to also integrate the note unit as a customer-operated solution.

Monitored with CashComplete® Supervisor SW

The supervisor software enables you to monitor the content and status of each CashComplete® POS by defining the minimum and maximum content of each "till".

CashComplete® Supervisor SW also stores all transactions from the tills and can generate reports such as End Of Day reports and transaction reports.

TECHNICAL SPECIFICATIONS

DIMENSIONS

COIN UNIT

WIDTH	276.5 mm / 10.89"
DEPTH	296.0 mm / 11.65"
HEIGHT	998.0 mm / 39.29"
WEIGHT	37.0 kg / 81.57 lbs

NOTE UNIT

WIDTH	222.2 mm / 8.75"
DEPTH	380.0 mm / 14.96"
HEIGHT	842.0 mm / 33.15"
WEIGHT	63.0 kg / 138.89 lbs

PC/POWER UNIT

WIDTH	580.0 mm / 22.83"
DEPTH	224.0 mm / 8.82"
HEIGHT	65.7 mm / 2.59"
WEIGHT	6.0 kg / 13.23 lbs
VOLTAGE	200-240 V / 50 Hz

CAPACITY

COINS	8 tubes with a capacity of up to 200 coins/tube
NOTES	6 drums with a capacity of up to 100 notes/drum
REJECT RATE	Coins 2.00% Notes 0.06%

SPEED	3 notes/s 1 coin/s
