

SCAN COIN Connect CDP Monitoring Software

Connect CDP reduces cost and provides efficient cash handling in public transport.

Self-service and improved security

This self-service solution provides 24/7 service for bus drivers and tram conductors, who can deposit excess cash at the Cash Deposit Point (CDP) and purchase new tickets and petty cash from the Ticket Dispense Unit (TDU). In addition drivers will no longer be tied to a manual cashier's working hours in order to deposit or change cash.

Monitoring and management – from one location

Monitoring connected CDP's and TDU's from one central location enables easy planning and management of machines at different locations. Connect CDP makes sure that all machines are up and running and ready to use.

Monitoring shows cash levels in note and coin boxes, receipt paper level and general status for each machine.

Management of machines includes to define and connect new machines, define ticket types and petty cash and finally to show statistics for a machine.

Management of drivers makes it possible to manage drivers with id, name and status, to view driver balance, transactions and statistics and to make corrections of faulty transactions or cancelled tickets.

Management of driver and machine ledger includes book-keeping and entering and balancing results from CIT companies that service machines, general statistics and balance and turn-over reports for selectable period.

Functionality

- Define TDU/CDP units to be monitored.
- View status of connected units and show on-screen warnings.
- View present and historic transactions.
- Make corrections to erroneous transactions or cancelled tickets.
- Manage drivers, operators, bus companies and ticket types.
- Show statistics on screen for a selected depot and selected period.
- Handle book-keeping.
- Print paper reports.

Key benefits

Improved security and accessibility for drivers – The risk of robbery is reduced when drivers can deposit excess or all cash, and purchase tickets and petty cash 24/7. The demand on cashier office is reduced and shorter opening hours reduce the total cost.

Superior overview – You can monitor and manage the activities of all your machines from one location.

Better planning – The software alerts you when coin level in boxes is high or when level of receipt paper is low, making it easier to plan optimum servicing, cash collection and replenishment.

Maximised availability – Warnings and error notices displayed by software will help reduce machine downtime as the necessary servicing can be rapidly provided.

OPTIONS	
LAN	Communication using TCP/IP
WAN	Communication using GPRS/GSM
WAN	Communication using MODEM

COMPUTER SPECIFICATIONS	
COMPUTER	Personal computer with an Intel Pentium 233-MHz or faster Processor (Pentium III recommended)
MEMORY	128 MB of RAM or greater
HARD DISK	130 MB of available hard-disk space
DRIVE	CD-ROM or DVD drive
DISPLAY	Super VGA (800X600)
OPERATING SYSTEM	Microsoft Windows 2000 with service pack 4 (SP4), Microsoft Windows XP, or later

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. Our worldwide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market.
