

» case story

We asked a Bank in Germany

“Our employees think it is the best note sorter they have used”

Why did you choose the SC 8200?

We invited different suppliers and received offers of over 40 different currency counters and sorters, which we narrowed down to three based on price and functionality. We performed extensive testing of the three products and SC 8200 came out as the top choice. The features that made SC 8200 stand out were:

- **Noise level** – the product would be placed in an open area and SC 8200 is very quiet compared to the competitors.
- **Readability** – the big screen makes it simple for both us and the customer to see the counts.
- **Size and weight** – the product is smaller and lighter than the competitors.
- **Easy to operate** – very easy to use with the touch screen.

Which business benefits or effects have you seen?

We have not made use of the full potential of SC 8200 yet but the flexibility of the built-in computer offers us a lot of options that might be needed later on. The possibilities to update the product to detect new notes, sort off unfit notes by the touch of a button and read serial numbers are very interesting.

We have decided to invest in a range of SC 8200 as our employees think it is the best note sorter they have used!
